

How to use the pixel width and height tools on Inkscape:

1. Select a graphic that you have already created with Inkscape, using the select tool.

2. Find the W, H, and scroll menu on the top row of tools in Inkscape.

3. Decide how large you want the image to be and what ratio (for example 1:1, 1:2, etc.). Explore different sizes and discover which one looks best. In some of my projects I use a width of 1200 px by a height of 800 px as in this example:
